LAS ANIMAS COUNTY FAIRGROUNDS **EXECUTIVE SUMMARY**

Jeffrey Wood

A fairground in modern Colorado life faces many challenges. Generally, a larger plot of land which gets used intensively for a couple of weeks a year and then becomes rather quiet for the balance of the year. Sure, there may be the opportunity to host rodeos or tractor pulls or concerts from time to time, but most often big arenas and exhibit halls sit empty in the fall, winter and spring before roaring back to life as the county fair season approaches. And often as not, these facilities are located in places that might need facilities of varying sizes to host reunions, weddings, club meetings, and conferences. The Las Animas County Fairgrounds in Trinidad has multiple underutilized facilities, but with a little vision, we can imagine a facility that operates year-round, providing spaces and places for a myriad of activities. From baseball diamonds and soccer fields to conference rooms and catering kitchens. How about an events center capable of hosting a wedding, a concert, or even a night at the theatre? How about an outdoor theatre for warm summer nights? Horseshoe pits, bike trails and a shady oasis to sip a cool drink or enjoy some lunch. The idea is to create a place with multiple levels of users - from athletes and picnic goers to folks watching a movie and attending a lecture all at the same time! With greater monetization the entire facility can be enhanced for users, such that other important comforts revealed in our survey (shade over the arena grandstand!) can become a reality. And along the way, an enhancement for the community and the neighborhood that goes from underutilized to overbooked.

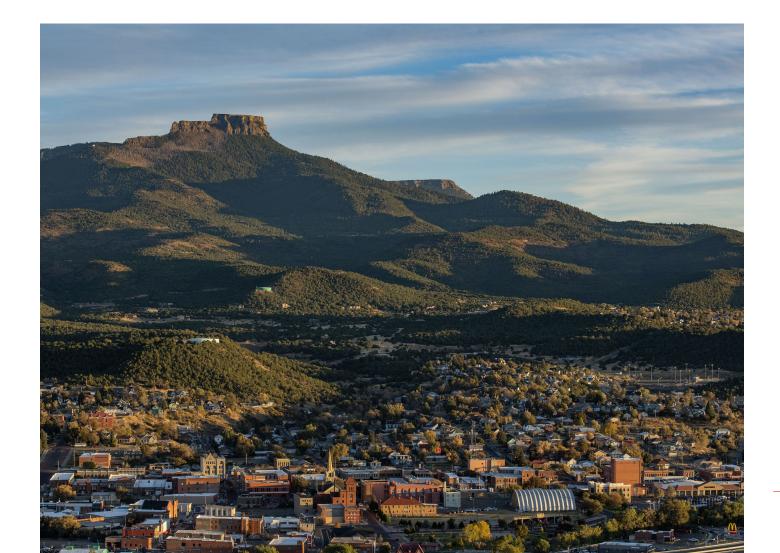

"We can imagine a facility that operates year-round, providing spaces and places for a myriad of activities."

"...from *underutilized* to overbooked."

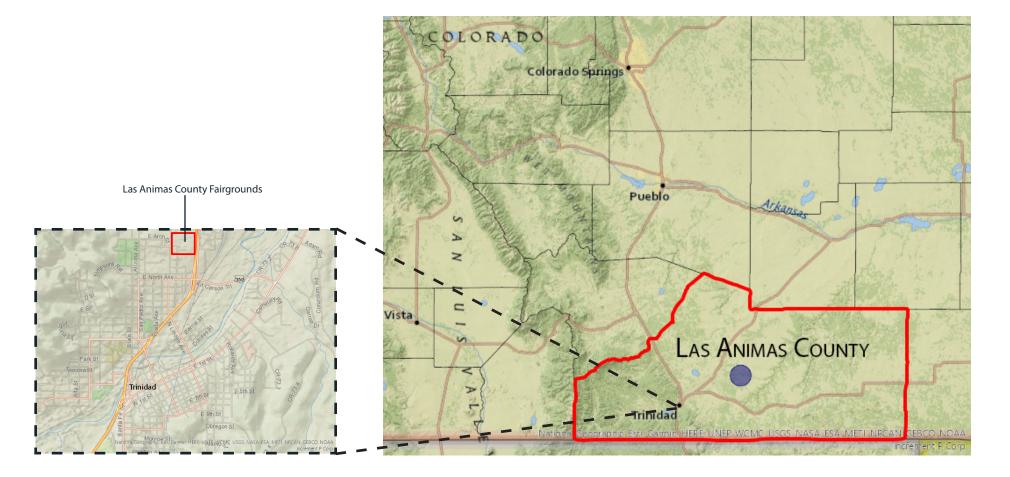

Santa Fe Trail.

LAS ANIMAS COUNTY FAIRGROUNDS **PROJECT BACKGROUND**

Las Animas County is situated at the southern border of Colorado with about 15,000 residents. It's most prominent city and the county seat is in Trinidad, which was founded in 1862 and is close to the

SITE CONTEXT

INTRODUCTION

DESIGN **OBJECTIVES**

Renovate the interior of the grandstand building to include rentable spaces, kitchen remodel, and the inclusion of ADA compliant elevator access.

A build-out of the existing pavilion building to include large event spaces, a kitchen, and an outdoor seating area.

Renovating the open space into a usable park space, complete with sporting fields, walkways, and a playground area

Improve seating, ADA access, and shading for the grandstand.

Our main objective across the entire fairgrounds is to attract more people by making the fairgrounds accessible for more year-round uses.

Part of this objective was to create usable, rentable spaces that can accommodate multiple functions: weddings, birthday parties, club gatherings, and the like.

Another part of this objective was to renovate the exterior to include usable park space, sports fields, and SHADE.

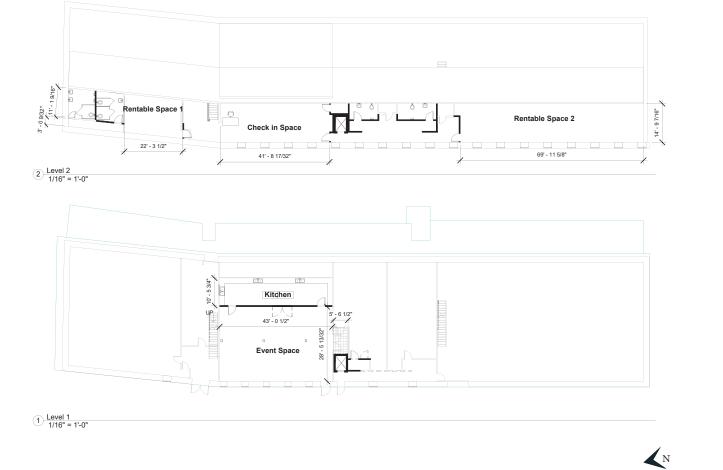

By accomplishing this objective, the fairgrounds will be a lovely place to be all year-round, an exemplary county fair space, and produce revenue for the county.

Develop an announcer's booth that works as a stage as well.

GRANDSTAND **FLOOR PLANS**

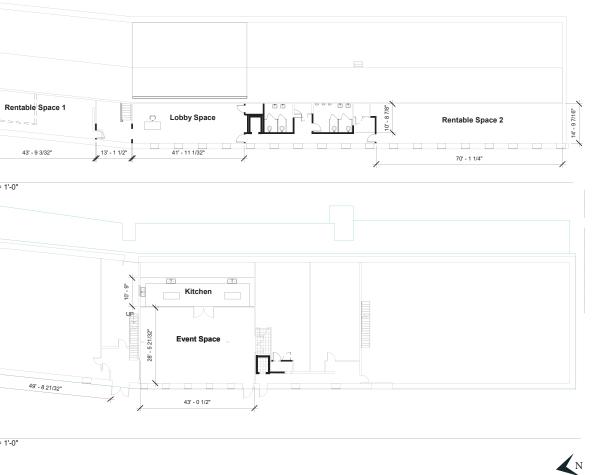

The goal for the renovations to the interior of the grandstand building is to create monetized, rentable spaces with the inclusion of an elevator and updated restrooms.

Plan A places the elevator next to the existing restroom on the bottom floor, renovates the existing restrooms on the top floor, and adds two singleuse restrooms at the center of the top floor.

1 Level 1 1/16" = 1'-0"

2 Level 2 1/16" = 1'-0"

Plan B places the elevator at the same location as Plan A, but demolishes the existing restroom on the top floor to create a more useful rentable room, then includes multiuse restrooms at the center.

FINAL GRANDSTAND **FLOOR PLAN**

Based on the feedback and communication with the stakeholders, Plan C was chosen to move forward with.

Plan C features an elevator placed near the existing staircase, creating a circulation core and a foyer before the check-in space on the top floor. Also on the top floor, we will include a conference room as another monetized, rentable space. We will also demolish the existing restroom as in Plan B, but will include multi-use restrooms in the central area as well.

Preliminary Opinion of Cost / Order of Magnitude

Las Animas County Fairgrounds Grandstand Building

Building Area Assumes entire building @ 28,450 square feet

Fall 2020

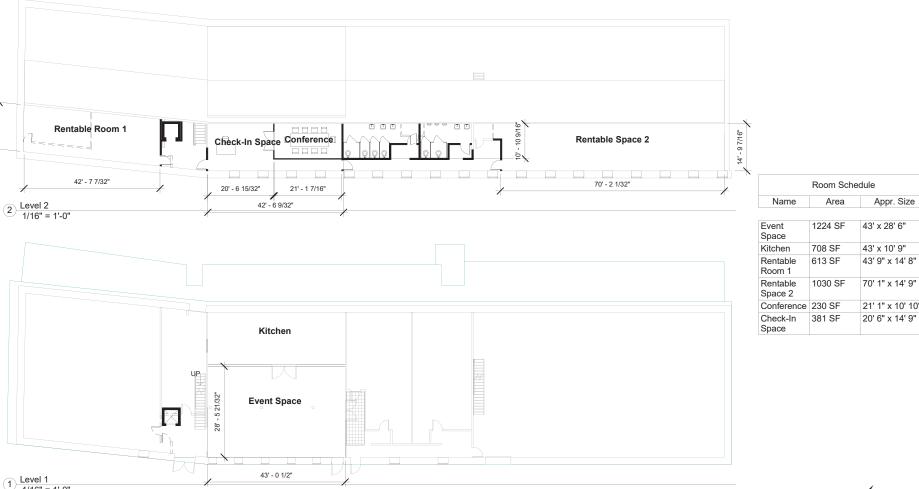

This cost estimate is based upon preliminary conceptual design and planning and should be used for information only for purposes of determining an order of magnitude. The estimate was completed without actual engineering and is subject to change. The estimate should be refined as more detailed design stages provide accurate quantities. The data used to compile the estimate is derived from industry standard sources such as 2016 RS Means data sets. Prices are subject to change with time and other industry related factors.

Indicates total new building construction area - broken out due to cost differences а

Assumed that site is already procured - existing

c With existing site, it is assumed that only minimal building support development needed

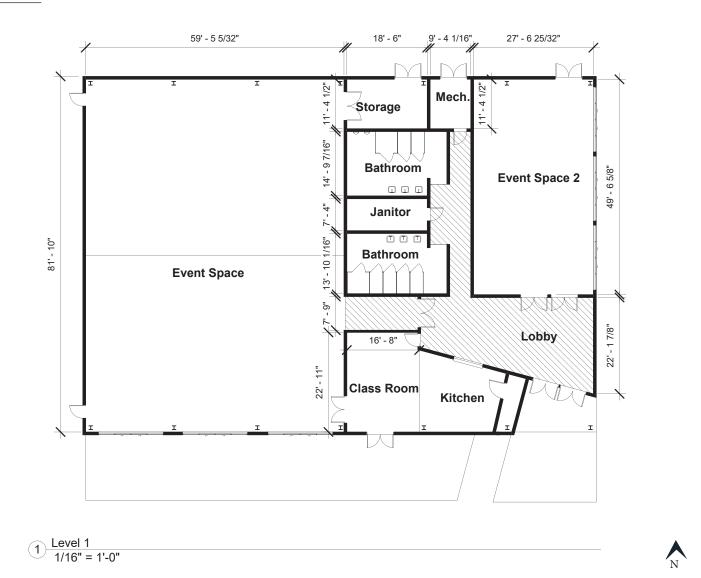

PAVILION **FLOOR PLANS**

The goals of the pavilion design is to build-out the existing structure in order to create monetized, rentable event spaces for weddings, concerts, and other larger events. Each design also includes a smaller event space, a catering/concession/classroom kitchen space and public restrooms.

Plan A includes an entrance in line with the existing road, a smaller kitchen, and a large event space that has three sides of exterior walls.

Plan B places the entry more central to the structure, offers a larger classroom and kitchen, and opts to have the large event space on the Northeast corner.

N

15

FINAL PAVILION **FLOOR PLAN**

Based on the community's feedback through the online survey, It was understood that the preferred floor plan for the pavilion build-out is plan C.

Plan C also places the large event space in the Northeast structure with a large storage/backstage area, but utilizes the south side (near the outdoor space) for the kitchen and classroom to access the exterior.

PAVILION **COURTYARD PLANS**

The UTA program team was asked to design a much needed shaded seating area during the fair. The proposed additions to the pavilion included a walled courtyard, fountain and paths, while prioritizing seating and shade.

Additional design suggestions included an outdoor theater, string lighting and native plantings

Plan A features a patio, shade awnings, a fountain and seating.

0 10 20 40

Plan B adds an outdoor theater and native plantings

Plan C uses a trellis walkway and lined tables for indoor/ outdoor events

0 10 20 40

0 10 20 40

FINAL PAVILION **COURTYARD PLAN**

Based on the community's feedback through the online survey, the UTA program team developed a preferred courtyard design which includes trellises and trees for shade, seating and tables, patios, an outdoor theater, paths, native plantings and a fountain. This design creates an oasis for year round gathering and celebration.

Preliminary Opinion of Cost / Order of Magnitude

Las Animas County: Pavilion Building Landscape

Proiect Area Assumes landscape improvements to proposed pavilion grounds, adding shade trees and trellis, an outdoor theater, seating, paths, and native plantings based on landscape plan in report

1.a-f Seating, Shade and Path 2.a-h Plantings and Fountain

(added seating, picnic area, pedestrian path, theater and shade trellis) (native trees and plants, add irrigation, and fountain)

This cost estimate is based upon preliminary conceptual design and planning and should be used for information only for purposes of determining an order of magnitude. The estimate was completed without actual engineering and is subject to change. The estimate should be refined as more detailed design stages provide accurate quantities. The data used to compile the estimate is derived from industry standards. Prices are subject to change with time and other industry related factors.

Notes:

- Pavers for path 4'x4' and 6'x6'
- Irrigation dependent on current system status and determined requirements

C Labor costs dependent on community support and volunteer days

DESIGN DEVELOPMENT

PARK PLANS

The UTA team started with five initial schemes for the park space of the fairgrounds.

Option 5 was selected to move forward with, which the team used in conjunction with an additional play area provided by the town, reclaiming the access road and incorporating the existing play area and trees on site.

PARK **PLANS**

Expanding on option 5 of the initial designs, the community gave input on potential athletic field layouts. The fields would make use of what is currently primarily parking, that would be reallocated to the south of the indoor arena.

The UTA team also designed four options for a mixed used pedestrian and cycling path, through and around the fairgrounds. The hopes with this multiuse pedestrian and cycling path would be to connect to existing town biking and walking trails, creating extensions through Trinidad.

Option C and the Red Path were chosen by the community via an online survey to move forward with.

Option A features a regulation-sized base ball field with a 60 by 94 yard soccer field.

0 25 50 100 N

Option B features A FIFA regulation sized, 70 by 110 yard soccer field with the softball sized baseball field.

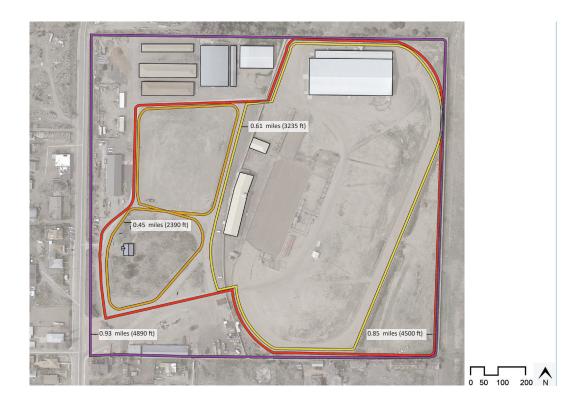

field.

Option C features two standard fields with surrounding lawn. This would include a softball sized baseball field and a standard 60 by 94 yard soccer

- The orange would figure eight the existing park and gravel parking area.
- The yellow would follow the road and tract, passing north of the indoor arena.
- The red would encompass these previous two paths.
- The purple would extend to the far reaches of the property, which would need a break in the wall that runs north to south through the site.

Preliminary Opinion of Cost / Order of Magnitude Las Animas County: Park Improvement and Path

1.a-k Park Improvements 2.a-h Sports Fields

3.a-d Pedestrian Path

Project Area Assumes landscape improvements to existing park, adding sport fields and a pedestrian path

(added picnic pavilion, basketball court, horse shoe pits, seating and lighting)	
(combined baseball and soccer fields with viewing area)	
(multi-use path around fairgrounds, with lighting, shade and seating)

- Irrigation dependent on current system status and determined requirements
- Labor costs dependent on community support and volunteer days
- E Crusher fines could be sourced or donated locally, cost TBD

Fairgrounds Site Plan showing preferred landscape improvements including: a multi-use pedestrian path, athletic fields, park and pavilion/ courtyard

FINAL PARK PLAN

DESIGN DEVELOPMENT

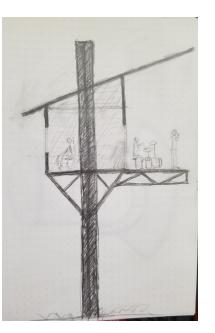

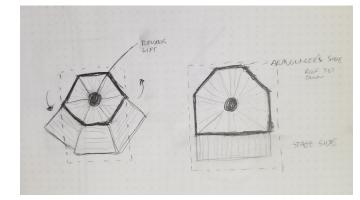

STAGE/BOOTH **CONCEPTS**

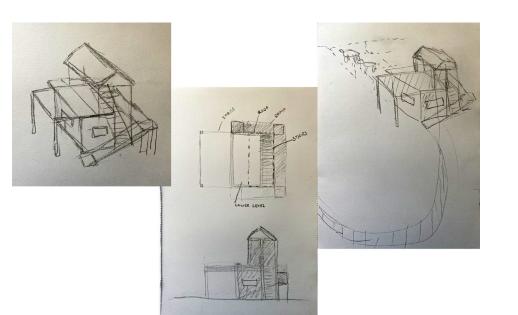

The UTA team started to develop concepts for the announcer's booth that is situated at the rodeo arena opposite of the grandstand. The task was to design an announcer's booth that will also be a stage for concerts and accommodate the rodeo chute, while complying with ADA building codes.

Concept 1 includes a stem-like center screw around which the booth/stage rotates. The rotation moves the stage/ booth up or down and replaces the need for an elevator.

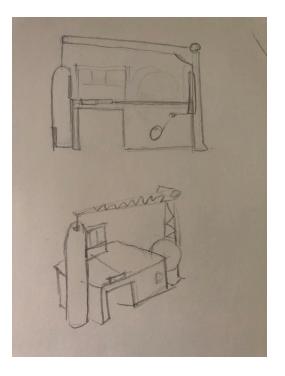

of a stage.

Concept 2 features a ramp necessary to comply with ADA codes that wraps around the announcer's booth and finishes at the front

Concept 3 features a lift that is brought up by a crane, which doubles as the truss for lighting over the stage. The announcer's booth is on wheels in order to move it directly to the front (over the chute) for maximum viewing during the rodeo, and can be moved back to create room for the stage during concerts.

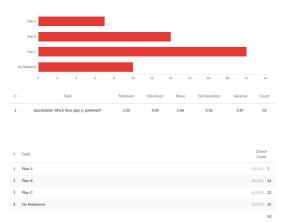

COMMUNITY **OUTREACH**

Due to the Covid-19 pandemic and subsequent travel restrictions, shut downs, and meeting cancellations, the UTA team corresponded with the Las Animas County stakeholders and community through online methods

An Online Survey was conducted to get direct feedback from the community to move forward with.

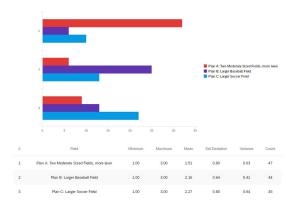

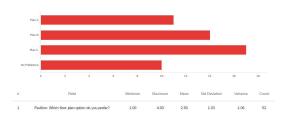

Showing rows 1 - 5 of 5

Q3 - How would you rank the field layout options? (Feel free to zoom in on the plan)

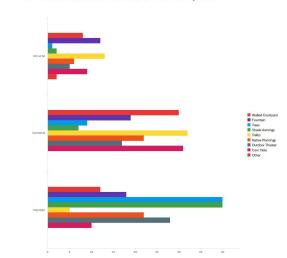

Q12 - Pavilion: Which floor plan option do you prefer?

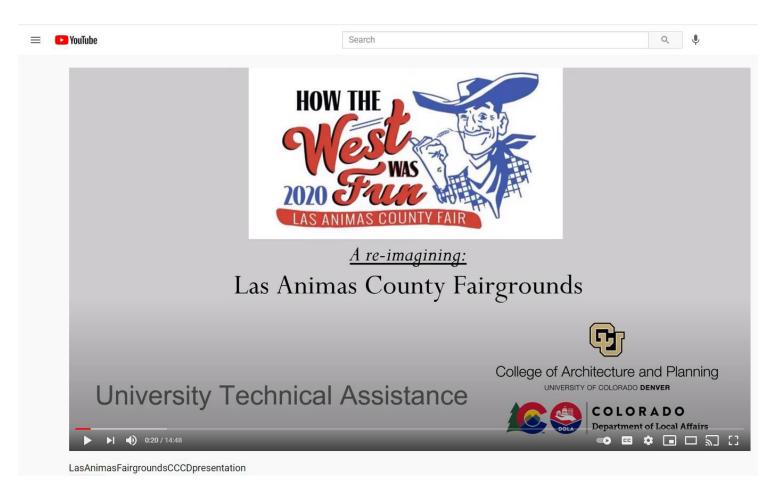

11	Field	Choic	ie it
1	Plan A	21.15%	11
2	Plan B	28.92%	14
3	Plan C	32.69%	17
4	No Preference	19.23%	10
			52

Q13 - Outdoor Pavilion: How would rank each element for your use?

DESIGN DEVELOPMENT

https://youtu.be/tYWKHxDVF-c

In the summer of 2020, the UTA team recorded and posted a YouTube Video presenting preliminary design schemes for the grandstand building, the pavilion building, and the park plans. A link to the video was given to the stakeholders to distribute to the community. The video allowed the community to see each of the design schemes and the explanations for each scheme directly from the UTA designers.
